Sujit Balasubramanian

Senior Software Engineer | Bengaluru, India

Website | GitHub | LinkedIn

sujitbalasubramanianr@gmail.com | +91 97896 97088

Skills

- **Languages**: C, C++, Lua, TypeScript, Java, Dart
- **Full Stack**: Qt, React.js, Next.js, NestJS, Flutter, Electron, Capacitor, PostgreSQL, Docker, Terraform
- **Graphics & Systems**: OpenGL, Vulkan, OpenCL, SYCL, LLVM, SPIR-V, CUDA, Linux Device Drivers, Wayland

Professional Experience

- **Senior Software Engineer | Green Collar Global** — Apr 2026 – Present
  Capacitor, Saucer, React, Next.js, C++, AVR, TypeScript — *greencollar.ai | Bengaluru, IN*
  - **Unified the cross-platform ecosystem and elevated developer velocity** by consolidating Flutter and Electron codebases into a single **Capacitor and native webview architecture** (Saucer/C++), deploying a shared web UI across Windows, Linux, and Android.

- **Software Engineer | Green Collar Global** — Apr 2025 – Mar 2026
  Flutter, Electron, Node.js (N-API), React, Next.js, C++ — *greencollar.ai | Bengaluru, IN*
  - **Accelerated product time-to-market** for flagship product *Taram* by **building the cross-platform mobile application in Flutter**, bridging proprietary vendor Java libraries via **Flutter Platform Channels**.
  - **Reduced operational overhead and ensured data integrity** by **developing automated workflows**, streamlining customer and operational data pipelines directly into downstream ML modeling systems.
  - **Automated core business operations** by **architecting a cross-platform desktop application** (Windows/Linux) in **Electron**, binding vendor embedded hardware libraries via **Node.js N-API** to stream device data to the web UI.

- **Co-Founder | IWood Technologies** — Jun 2023 – Mar 2025
  React, NestJS, PostgreSQL, Docker, Terraform, AWS — *iwoodtechnologies.com | Remote*
  - Pivoted the business from a service-oriented agency to a scalable product model by **architecting a reusable e-commerce platform**, successfully transitioning clients from traditional workflows to an online sales model.
  - **Drove a 5x increase in digital order volume** by engineering modular consumer storefronts, automated discount engines, and real-time inventory management with secure payment gateways.
  - Streamlined complex business operations by **developing custom administrative and billing software**, significantly optimizing day-to-day internal workflows.

- **Software Consultant | Green Collar Global** — Oct 2023 – Mar 2024
  React, Next.js, Payload CMS, TypeScript — *greencollar.ai | Bengaluru, IN*
  - **Engineered the admin web application** for flagship product *Taram* using **React**, unifying real-time kiosk order tracking, internal operations, and user management to **streamline order processing workflows**.
  - **Developed and deployed the official company website** leveraging **Next.js and Payload CMS**, delivering dynamic content management to **elevate site performance and digital brand presence**.

Projects

- **MSD | My Simple Desktop**
  Linux, Wayland, OpenGL — *code*
  - WIP...

Education

- **Kongu Engineering College** — Tamil Nadu, IN
  B.Tech in Artificial Intelligence & Data Science; GPA: 7.48 — *Nov 2021 – Mar 2025*
